**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 0 403 138.

As to claims 1, 2, 9, and 12, EP '138 discloses a device capable for fusion and agitation on a two immiscible phases. The device comprising a crucible (10), fusion and agitation means (14), wherein the fusion means comprises an inductor to supply alternating current at first and second frequency, wherein the first maybe lower than the second (abstract).

As to claim 3, EP '138 discloses a capacitor (38), an induction generator (36), and a function generator (34) (Figure 1).

As to claim 4, the induction generator (36) is capable to generate 10 to 300 kW.

As to claim 5, the frequency can be formed between 1 to 20 kHz.

As to claim 6, the modulation frequency can be from 0.5 to 10 Hz.

As to claims 7 and 8, the crucible can be hot or cold.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP ('138) in view of Eckert (US 5,968,223).

EP '138 discloses the claimed invention above, but lacks the mentioning of susceptors in the crucible.

Eckert discloses baffle heaters placed in the crucible to promote heating of the molten metal by both sides of the baffle heaters (col. 4, lines 17-21).

Therefore, it would have been obvious to an ordinary skill in the art to have baffle heaters as taught by Eckert, in EP '138 for the purpose of promoting heat in the molten metal.
